Abstract

This document demonstrates how to use the LSST LaTeX class files to make a Data Management tech note. Build this document in the normal way, making sure that the class file is available in the LaTeX load path.

Title of document

1 Introduction

Now write your document as you would normally write it. Different citation schemes are supported, and the default bibliography style is declared by the class. In this example we have enabled author-year citing. Use `\citeds` for citing docushare documents.

`\citedsp`: [LPM-17; LSE-30]
`\citeds`: (SRD; LPM-17; LSE-29)
`\citep[][]`: (e.g., LSST Science Collaboration, 2009; Jenness et al., 2016, are interesting)
`\cite`: McKercher (LPM-51); Wang et al. (2011)

Font checking: `Fixed width font`, SMALL CAPS, **Bold**, *Italic*, ***BoldItalic***.

Math checking: $A = \pi r^2$~(mathroman)(*italic*)(sansserif)$0 == \mathbf{0\xi}$

$$O(x, z) = \sum_{\lambda} I(x', \lambda) \otimes D(\lambda, z) \tag{1}$$

Reference a JIRA ticket with `\jira{DM-1234}`: DM-1234.

Talk about something that relates to a requirement. OSS-REQ-1234

We can show new text and text to be removed.

XXX This is something that needs fixing.

There are special environments for calling out text blocks.

Note

Default note with default title.

Draft

Optional Note Title

This is used for note blocks.

Warning: Scary

Some warning information.

Warning

Default warning title.

Comment for draft

This text should only appear in draft mode.
