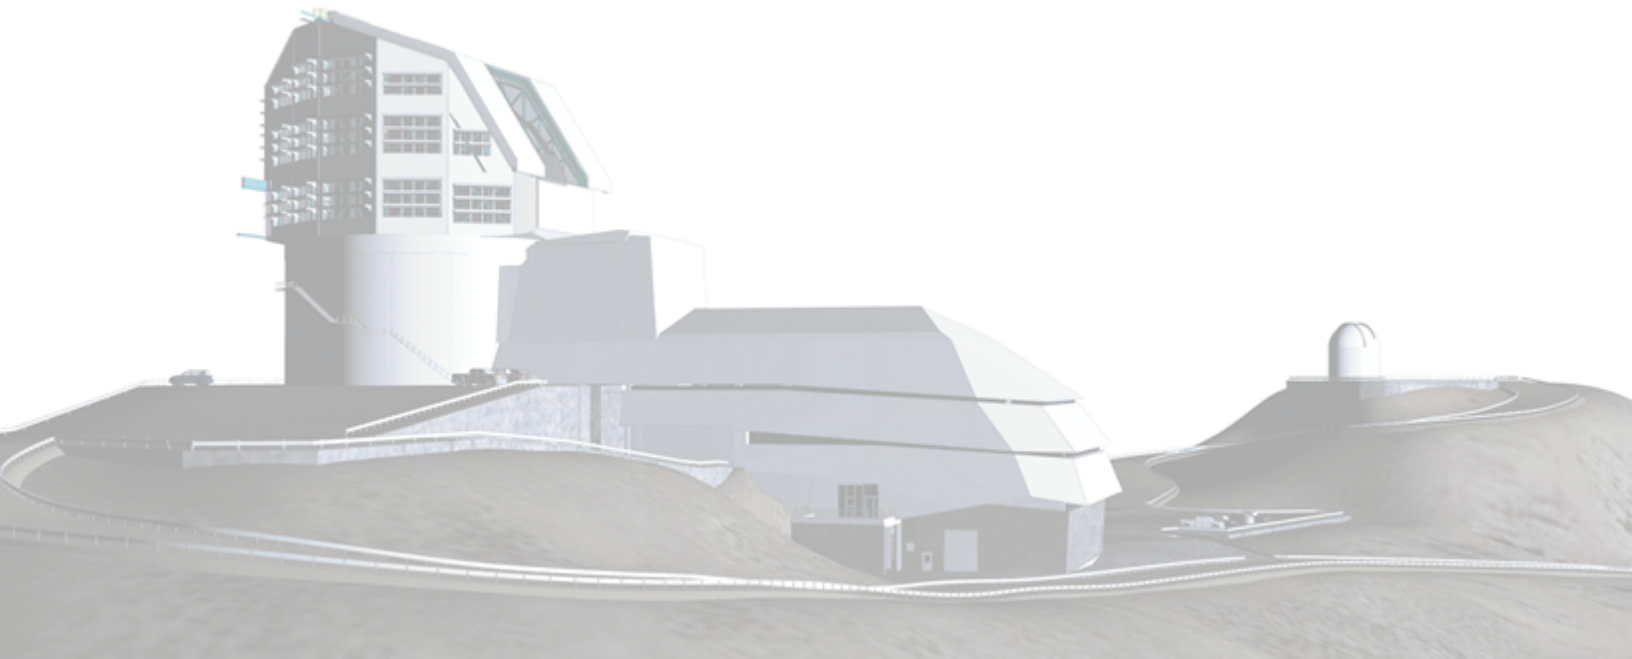
Bibliography Verification

Automated Content

LSST-test

Latest Revision: 2025-09-10



Abstract

Standard LSST document class example but using all bibtex entries. This allows the bib files to be tested as well as the associated bibtex style.

Contents

1 Introduction 1

Bibliography Verification

1 Introduction

In the following pages, all bibliographic entries from this repository will be listed. These are used to test that the entries in the relevant `.bib` files are formatted correctly. Bibtex will issue Warnings but the build will only be stopped if Errors are located.

Test the standard references to baseline documents: (SRD), DPDD, LSR, OSS, DMSR, LDM-133, LDM-134, SUID, DMSD, MOPSD, DMMD, DM OpsCon, (LSE-63), LSE-180, UCAL.

`\citedsp`: [LPM-17]
`\citedsp[]`: [Verify] [Requirements]
`\citeds`: (SRD; LPM-17, LSE-29)
`\citeds[]`: LDM-503
`\citep[][]`: [e.g., 876, 382, are interesting]
`\cite`: [876, 382]
